JOB MOSES UBEH

DATA ANALYST

PERSONAL PROFILE

Creative, industrious, result-oriented, and solution-driven Data Analyst with excellent skills in data analysis, data visualization, and database management. Possessing strong communication and analytical capabilities, I am passionate about crafting data-driven business solutions and seek to broaden my horizons by taking on a data analytics role in a technology-driven company.

WORK EXPERIENCE

QUALITY ASSURANCE/CONTROL SPECIALIST
DRURY INDUSTRIES LIMITED, AGBARA, OGUN, NG.   JULY 2023 – PRESENT

- Develop, implement, and review quality assurance policies and procedures
- Investigate customer complaints and non-conformance issues
- Perform data analysis on quality data for anomaly detection and process optimization
- Analyze wide range of materials, in-process materials and products from Alum plant, Acid plant and utility plant to ensure quality conformity with standards.
- Maintain and organize all records, documentation, and other files associated with quality control and inspection tasks.
- Manage and liaise with both internal and external stakeholders, and other production team to ensure successful product delivery in compliance with both internal and external standard

IT SUPPORT SPECIALIST
KUIDAWA ICT CENTER, KANO, NG.   JAN. 2022- NOV. 2022

- Evaluated and assessed the effectiveness of technology integration initiatives through surveys, feedback, and data analysis.
- Provided technical support and troubleshooting assistance to teachers and staff regarding hardware, software, and network issues.
- Foster a culture of innovation and technology integration by organizing technology showcases, competitions, and events.
- Oversaw the training of 500 teachers and students in Information and Communication Technology (ICT) skills, equipping them with essential digital competencies.

DATA ENTRY
AFRICAN EPIDEMOLOGY NETWORK (AFENET)   MAR. 2022 – NOV. 2022

- Collect health data and entered it into databases, ensuring accuracy and completeness of data and improving data quality by 25%.
- Maintained confidentiality of sensitive data and followed data entry procedures and standards, ensuring compliance with regulatory requirements and protecting sensitive information.
